Product: Antystatic clothing set

Manufacturer: -

Modelno: AJ-101/001/A

Specific features:

- antistatic features
- fastening with press studs covered with a placket
- increased strength of seams
- cuffs on sleeves
- suspenders with rubber band on the back

Norms:
EN ISO 13688 EN 343 EN 1149-5

Description
A garment consisting of a ?¾ jacket and dungarees effectively protecting against wind and rain, designed for work in explosion hazard zones. Double sided welding technique increases durability of seams. Practical, placket fastening and adjustable hood. Comfort of use is increased by cuffs in sleeves and suspenders with wide rubber band at the back. Proper electrostatic properties is ensured by the lack of metal elements on the outside.

Material
PLAVITEX ANTISTATIC - a polyester-based material coated on one side with PVC. It is resistant to tearing and has waterproof stitching. Due to the unique chemical composition of the coating the material has antistatic properties and can withstand adverse weather conditions and bending at temperatures down to -50?°C. The material meets the requirements of the EN 343 and EN 1149-5 standards, which has been verified by tests conducted by a certified textile testing institute.
