Product: WATERPROOF SEA SMOCK

Manufacturer: -

Modelno: AJ-1066

Waterproof sea smock Model 1066 is made of Plavitex Heavy Duty - poliester/PVC/PU fabric with basis weight 700 g/m² and thickness of 0,70 mm; Product is bending proof by low temperatures up to -50ºC. It is made for people who works on high seas, but also for those, who have manual labor and works at land in extreme weather conditions (rain along with strong wind). Thanks to double stitched seams with high frequency current, the product gives you a high quality of production and offers you a good resistance of product. By redoubling surface coating, the smock is highly resistant to mechanical harms. We have gained high parametres of product resistant to salt water as well as different kinds of damages - rips, abrasions etc. Outcome of all of these technologic processes is a very long durability of this product. The product conforms with the european standars EN 340 and EN 343.

Price: 69,50 EUR
