>

Product: WATERPROOF ANTISTATIC FLAME RETARDANT OVERALL WITH PVC SAFETY BOOTS S5

Manufacturer: -

Modelno: AJ-504/A

weight :530 gram/m²
thickness :0,65 mm

The overalls is made of high quality fabric coated PU/PVC which are resistant for mechanic harms. The bottom part of clothing is made of Plavitex Multi, thickness 0,65mm (weight 530g/m²) in black colour with reflective stripes. The upper part is made of Plavitex Multi too, but in fluorescent colour, also with reflective stripes. The product includes a waterpellent zipper used in the upper part of the back and welded Safety Boots S5 with steel toe cap and steel midsole as a protection against perforation. This product is used in draining canals, where there's a lot of water and high level of wetness. Extra double “high frequency welded” seams ensure reliability under the most extreme conditions. The product conforms with the EN 340, EN 343+A1, EN 1149-5, EN ISO 14116 standards. Available sizes of overalls – 48-62; PVC Safety Boots – 39-48.

Price: 145,95 EUR
