Product: WATERPROOF WARNING COAT

Manufacturer: -

Modelno: AJ-1102

Material: 350 g / m²
EN ISO 13688, EN343, EN ISO 20471
The jacket is made of polyester knitted fabric and coated with polyvinyl chloride. The product is used wherever work is carried out in difficult conditions and in bad weather conditions and in poor visibility. The reflective strips are used in certain places according to European standards. The coat is recommended for road workers and on construction sites where visibility is very important. Thanks to the double-sided welding of the seams with high-frequency electricity, the product protects against the strong wind and rain. The hood of this jacket was designed, which can be pulled on the face; the pockets are let in so that the water does not get inside. The product is manufactured according to the European standards: EN 340, EN 343 and EN 471.
The delivery time for these products is 14 days.
If you order larger quantities, you will receive a cheaper PRICE OFFER, please contact us by phone or in writing by e-mail.
