Product: Thigh waders antistatic
Manufacturer: -
Modelno: AJ-WRA02B

Specific features:

- antistatic properties
- increased strength of seams
- elastic fixing tapes
- high quality wellingtons
- resistance to bending in low temperatures

Norms:

EN ISO 13688 EN 343 EN 1149-5 EN ISO 20347 - O4 FO SRC

Description

Waterproof trousers with permanently welded, high quality boots. Made of durable coated material with anti-electrostatic properties. Welding technique on both sides increases the strength of seams. The product is resistant to bending in high negative temperatures. Equipped with special elastic straps for belt attachment.
Material

PLAVITEX HEAVY DUTY ANTISTATIC - a polyester-based material coated on one side with PVC. It is highly resistant to tearing and has waterproof stitching. Due to the unique chemical composition of the coating the material has antistatic properties and can withstand adverse weather conditions and bending at temperatures down to -50Â°C. The material meets the requirements of the EN 343 and EN 1149-5 standards, which has been verified by tests conducted by a certified textile testing institute.

**Price: 88,95 EUR**
