Product: WATERPROOF ANTISTATIC FLAME RETARDANT JACKET

Manufacturer: -

Modelno: AJ-500/A

weight :530 gram/m²
thickness :0,65 mm

The jacket is made of high quality fabric coated PU/PVC and it's waterproof and antistatic and flame resistant fabric – Plavitex Multi (thickness 0,65mm, weight 530 g/m²) in fluorescent orange and navy blue colours. The jacket has also reflective tapes; The seams are welded with high frequency current; The product can be used for welding or grinding in the open area, in adverse weather conditions, where there's a high level of wetness. The jacket protects against rain and wind and enables the user to work in territories endangered by explosions and in high-risk zones. Extra double “high frequency welded” seams ensure reliability under the most extreme conditions. The product conforms with the EN 340, EN 343+A1, EN 1149-5, EN ISO 14116 standards.
