>

Product: WATERPROOF ANTISTATIC FLAME RETARDANT COAT

Manufacturer: -

Modelno: AJ-506/A

weight :530 gram/m²
thickness :0,65 mm

Made of polyester fabric coated with polyvinyl chloride. The coat fastened with metal snap-fasteners covered with a fold in order to protect the worker against electrostatic loads. In very poor weather conditions the head can be protected with a specially designed hood. The coat fully protects against rain and wind and enables the user to work in territories endangered by explosions and in high-risk zones in contact with the volatile gases and vapors of methane. The product conforms with the EN 340, EN 343, EN 1149-5, EN ISO 14116 standards.

Price: 108,95 EUR
